EDUCATION

University of California, Los Angeles (UCLA)

B.S. Data Science and Statistics | B.A. Business Economics | GPA: 3.72

Los Angeles, CA

Sep 2022 - Jun 2026

- **Honors:** William F. Sharpe Fellow (Consulting), Sharpe Fellows & LA 28 Case Competition: Winner, Dean's List & Honors
- **Coursework:** Data Analysis & Regression, Linear Modelling, Statistical Programming in R, Statistical Consulting

PROFESSIONAL EXPERIENCE

The Cigna Group

Jun 2025 – Aug 2025

Actuarial Intern (Product Strategy Focus)

- Conducted quantitative analysis of pricing models across 5+ insurance products using R and Excel, applying predictive modeling to recommend adjustments that improved projected profit margins by 25% while balancing client retention.
- Partnered with analytics and tech teams to refine forecasting models in R, resolving discrepancies between projected and actual claims/premiums across 10+ plans and strengthening product reliability and risk detection.
- Evaluated underperforming product lines by analyzing internal financial trends and external market signals, enabling targeted recommendations that reduced potential losses by 15% and improved product lifecycle resilience.
- Redesigned and automated reporting workflows in Excel by creating structured databases and standardized templates, improving data accuracy and reducing reporting time by 30% to support faster cross-functional decisions.

NymCard

Jun 2024 – Aug 2024

Product Manager Intern

- Enhanced user experience and platform efficiency by analyzing customer behavior data and streamlining workflows, boosting engagement by 15% and operational efficiency by 25%.
- Defined and prototyped product features in Figma while managing requirements in Jira, integrating usability testing insights, security considerations, and business priorities to deliver a timely product roadmap.
- Led data-driven QA/UAT testing with predictive analysis to identify pre-launch risks, reducing post-launch issues by 15% and building long-term platform reliability and user trust.

TradeUp

Jan 2024 – Apr 2024

Technical Program Manager

- Sized the online reselling market by defining analysis criteria and evaluating CAGR estimates and industry growth potential, equipping leadership with data to prioritize long-term product strategy.
- Applied predictive modeling in Python (Pandas, SQL) to analyze customer behavior and industry trends, proposing new revenue streams that boosted ARR by 35% and reduced business risk exposure.
- Built Databricks dashboards integrating SQL queries and automated Python scripts to track engagement, revenue, and risk indicators, enabling stakeholders to make evidence-based, real-time product decisions.

American International Group

Jun 2023 – Aug 2023

Data Analyst Intern

- Leveraged R, SQL, and statistical modeling to analyze customer survey data, uncovering engagement drivers and shaping strategies that improved engagement by 20% and informed product-market positioning.
- Strengthened market presence by leading a regional campaign with product heads, brokers, and clients, demonstrating cross-functional leadership and aligning data-driven insights with business strategy to enhance awareness and decision-making.

EXTRACURRICULARS & LEADERSHIP

Resident Assistant – UCLA Residential Life

Jan 2025 – Present

- Facilitated conflict resolution and crisis response for a diverse community of 80+ residents, demonstrating strong interpersonal skills, teamwork, and sound judgment under pressure.
- Organized and executed 10+ events focused on inclusion, wellness, and academic support, strengthening community engagement and improving resident experience.

Associate Consultant – International Business for Bruins (IBB)

Oct 2022 – Present

- Analyzed UCLA student demographics and social media trends using R to recommend targeted marketing strategies for a local restaurant, boosting their campus presence and engagement with the student body by 50%.

Predictive Modeling for Housing Prices and Uber Fare Analysis

Apr 2024 – Jun 2024

- Trained and evaluated multiple machine learning models, including XGBoost and linear regression, optimizing hyperparameters, applying cross-validation, and analyzing feature importance to improve predictive performance.

SKILLS

Programming Languages: R, Python, SQL, Tableau, HTML, CSS, JavaScript

Tools: Pandas, MySQL, R Studio, Databricks, Jira, Snowflake, Figma, Adobe Analytics, Microsoft Office, Power BI
